

Structure Plane

Information Architecture

One scrolling page, with a fixed navigation bar that links to all sections.

Interaction Design

- The navbar links will be labeled: Rick Russell, Testimonials, About Rick, Gallery, Contact.
- The labels will collapse to a burger menu in mobile views.
- When a cursor hovers over the labels, they will change colour (to something contrasting) to indicate that they can be interacted with.
- The Rick Russell label is always visible even on mobile views, so that the user is always aware of what website they are on. Clicking it reloads the page, so it will feature a different hover effect to distinguish it from the other labels.
- The footer will include links to social media pages, that also feature hover effects and will open in the pages in a new tab.
- Also considering links included on the About Rick page as well.
